Castle Rock, CO

Experience

Dec 2019 - April 2020

Front-End Engineer, TECOBI

I was responsible for creating the second version of their suite of applications that are used to send and receive millions of text messages to and from potential car buyers.

Technologies: Python, React, Ionic, Swift

Feb 2016 - June 2016

Senior Software Engineer, Peregrine Academic Services

I was responsible for developing new feature and maintaining the assessment portions of Peregrine's courses as well as their Career Readiness Courses. I also had a large role in DevOps completing their move from SVN to Git and introducing continuous deployment & automated testing.

Technologies: C#, Node.js, React

July 2011 - Dec 2019

Multiple Development/Management Roles, FullContact

I was responsible for maintaining and developing new features for Contacts+ marketing site, web application, Google Chrome extension and various integrations such as Zapier. I also maintained back office integrations into metrics and analytics systems. For half of my time there, I also managed the web application team.

Technologies: Clojure, Node.js, React, Nuxt.js/Vue

July 2010 - May 2011

Lead Web Engineer, Wisper

I was responsible for leading the web effort for a startup that allowed businesses to claim their profile and better connect with their customers. This also included SMS marketing technologies.

Technologies: Grails

September 2006 - July 2010

Developer, Dimension Technology Solutions

I was responsible for working on multiple projects with regards to bolt on plant maintenance software. I worked mostly on integrations with SAP and Mincom Ellipse

Technologies: C#, ASP

About

Knowledge is my passion. I love learning every day and I'm always trying to improve myself. I am self-motivated and like to work smart and fast. Technology has always been at the core of my life. I've always had a fascination with how things work. My love for technology has been the driving factor in my career. While my visual design skills are limited, I enjoy writing software that results in an end product that is both beautiful and functional. I've spent a large part of my career writing web and iOS applications. I care deeply about user experience which is why I strive to develop world-class software. While I have spent the majority of my career focusing on frontend development, I also have a strong background in backend architecture and in the creation/consumption of APIs.

Core Skills

Front End Development

UX Design

API Development

iOS App Development

Continuous Deployment

Technical Skills

Vue	React	AWS
Node.js	Clojure	Docker
